

Minimize your expenses

Savings on purification of waste water as well as purchases of water

Total savings: **2.14 million EUR**

Above mentioned calculations include the purchase of one clean water unit (CWU)

Calculations

The graph above shows the savings a company could obtain by purchase of a Clean Water Unit from Sunstone Water Group. The solution reduces water consumption as high removal rates makes a partial flow of the process water reusable. The company also attains substantial savings on special contributions for the discharge of wastewater.

Assumptions

Annual water consumption as a basis: 100.000 m³
Purchase of water per m³: EUR 0,80
Discharge fee per m³: EUR 3,49
Special contribution per m³: EUR 0,54
Purchase of water per m³: EUR 0,80
Reused water per year: 60.000 m³
